Installation and Performance	3
Welcome	3
Technical Support	5
Using the Documentation	5
For the Impatient	5
Read This First!	5
Installing Visual Reality	6
Visual Reality Recommended System Configuration	6
Operating Visual Reality With Other Windows Applications	11
Using the Visual Reality Programs Together	11
Tutorial 1: QuickStart	13
Starting Renderize Live	13
The Renderize Live Opening Screen	13
What is a Renderize Live Project?	14
Loading a Project from Disk File	15
Displaying a View in the Viewport	16
Rendering a View in the Viewport	17
Arranging Resources in 3D Space	18
Quick-Rendering a View in the Viewport	20
Editing Project Resources: the Resource Designer Windows	23
Generating a Final Rendering	25
Viewing a Final Rendering	26
Tutorial 2: Creating a Project	29
Restarting Renderize Live	29
Loading Objects Using Visual Catalog	29
Creating a View	30
Arranging a View	32
Rendering a View	35
Loading and Extruding AI Files	36
Adding Resources to the Active View	37
Using the Bounding Box Commands	38
Changing the Extrusion Depth of an Object	39
Creating and Adding 3D Text	40
Using Images as View Backgrounds	44
Saving a Project	45

Tutorial 3: Exploring Materials	47
Working with Color Palettes	48
Creating Shiny Materials	50
Using Images as Texture Maps	51
Using the Material Designer Viewport	52
Creating Reflective Materials	54
Creating Transparent Materials	55
Rendering Part of a View	56
Smoothing Objects	56
Splitting Objects	57
Joining Objects	58
Splitting Models into Multiple Objects During DXF Importation	59
Tutorial 4: Texture Mapping	63
What is a Texture Map?	63
Setting Mapping Types	64
Scaling Textures in Relation to Objects	64
Performing Test Renderings in the Object Designer Viewport	65
Orienting Textures in Relation to Objects	66
Determining the Texture Repeat Type	67
Assigning a Different Material to an Object	68
Applying a Bump Texture	69
Using Color Textures and Bump Textures Together	70
Assigning Materials to Parts of Objects	71
Changing the Viewport Display During Selection	74
Creating Material Libraries	76
Tutorial 5: Working with Images	77
Combining Colors and Textures	77
Editing Images	78
Modifying a Texture by Modifying an Image	79
Saving Images to Disk	79
Image File Extensions and Image File Conversion	80
Loading and Saving Images from the Image Designer	81
Exploring Image Processing	81
Editing Background Images	83
Saving Test Renderings	84
Saving Test Images to Disk	85

Tutorial 6: Working with Lights	87
Locating and Positioning Lights	87
Positioning New Lights	89
The Different Types of Lights	90
Creating Area Lights	92
Creating an Attenuated Light	93
Creating Shadows	95
Setting Shadow Map Size	97
Self-Shadow Bias	98
Setting Shadow Density	99
Changing a Light's Color and Intensity	99
Final Considerations	100
Tutorial 7: The Final Render	101
The Rendering Options	102
Setting the Final Aspect and Resolution	102
Assigning a Filename and File Type	104
Viewing an Image	104
Tutorial 8: Advanced Materials	105
Creating Metallic Materials	105
Creating Transparent Materials	108
Using Bump Maps to Create Surface Effects	109
Inverse Opacity	111
Making a Decal	112
Tutorial 9: Using Alpha Channel Mattes	115
Alpha Matte Applications	115
Creating the Alpha Matte	116
Integrating 2D Clip Art Images into a Rendering	118
Tutorial 10: Editing Object Normals	121
What is a Normal?	121
Why is the Direction of the Normal Important?	122
Rendering Objects with Reversed Normals	122
Overcoming Backface Issues by Rendering Backfaces	123
Modifying Normal Directions: The Normals Toolbox	123
Using the Fix Button	126

Tutorial 11: Environmental Reflection Mapping	127
Environmental Reflection Mapping Types	127
Spherical Reflect	128
Floor Reflect	130
Controlling the Resolution of Environmental Reflection Maps	133
Saving Environmental Reflection Maps	134
Limitations of Reflection Maps	134
Using Reflection Maps During View Animation	134
Tutorial 12: Camera Animation	135
Creating Views to Use as Keyframes	135
Setting Views as Keyframes	138
Viewing Animation Paths in the Viewport	139
Appending Keyframes on the Animation Path	140
Moving a Keyframe View	140
Inserting Keyframes Along an Existing Animation Path	141
Modifying the Animation Path by Editing Tangents	143
Changing the Number of Frames Between Keyframes	144
Previewing an Animation	144
Generating an Animation	145
Playing an Animation Sequence	146
Additional Tips on Defining Animations	146
Tutorial 13: Object Animation	149
Tutorial 14: Light Animation	155
Tutorial 15: The Plot Editor	161
Tutorial 16: Using Visual Model	163
Overview	163
Set Drawing Units	164
Drawing a Curve	165
Setting Absolute Points	165
Selecting and Deselecting Objects in the Viewport	167
Drawing a Rectangle	167
Setting Relative Points	168
Copying an Object Along a Path	168
Setting Points on an Existing Object	169

Copying Objects in a Circular Direction	170
Opening Alternate Viewports	171
Assigning Objects to Layers	172
Drawing a Circle by Radius	174
Panning the Viewport	175
Copying an Object	176
Pasting an Object	176
Defining a Rectangle	177
Setting Points in 3D Space	177
Selecting Additional Objects in the Viewport	178
Linking Objects with a Polygon Mesh	179
Drawing a Circle by Diameter	181
Defining an Extrusion	182
Saving Files	183
Rendering Objects in Visual Model	184
Transferring Models to Renderize Live	185
Summary	185
Tutorial 17: Using Visual Image	187
Launch the Software	187
Interface Layout	187
Functional Overview	188
Loading, Modifying and Saving Images	188
Working in the Image Mode	189
Working in the Object Mode	192
The Visual Catalog Utility	213
Overview	213
Creating and Organizing Catalog Files	214
Loading Catalog Files into Visual Catalog	216
Selecting Resources to Load into Visual Reality Applications	216
Loading Resources into Visual Reality Applications	219
The Visual Catalog Menu Bar Commands	222
Renderize Live Overview	223
Renderize Live Screen Display	223
Renderize Live Project Resources	223
Resource Designer Windows	223
Mouse Conventions	224

Interface Entities	225
Using Resource Icons	227
Using Drop-in Wells	229
Using and Controlling the Resource Designer Windows	230
Renderize Live File Organization	234
Renderize Live Project File Types	234
Customizing Renderize Live	236
Using Renderize Live with Other Visual Reality Applications	236

The Project Designer 239

What is a Project?	239
The Project Designer Window Layout	239
Introduction to Project Resources	240
Creating and Manipulating Views	242
Loading and Saving Files: An Overview	245
Loading and Saving Projects	246
Saving Projects to VRML	247
Loading and Saving Objects	247
Loading AI and WMF Files	248
Loading AI and WMF Files from Specific Drawing Products	251
Loading DXF Files	252
Loading an SHP File: The SHP File Reader	255
Changing Object Geometry	255
Loading and Saving Images	255
Loading Images Through the Windows Clipboard	256
The Menu Bar Commands	256
The Command Bar	260
The Viewport	266
The Resource Manager	266
Rendering Views: The Render Toolbox	268
Orienting Project Resources in a View: The Move Toolbox	272
Defining Material-to-Object Relationships: The Select Toolbox	276
Viewing and Changing Object Normals: The Normals Toolbox	279
Defining Colors: The Color Toolbox	283

The View Designer 285

The Default View	285
Creating a View	286
Positioning the Camera	287

Setting the Camera Lens Optics	287
Defining a View Background	288
Setting the Amount of Ambient Light	289
Defining a Depth Cue: The Fog Check Box	290
Defining a Clipping Plane	290
View the Object Hierarchy for a View	291
Creating Multiple Views in a Project	291
View Realism	291

The Object Designer **295**

General Object Properties	296
Loading Objects	297
Displaying and Manipulating Objects	297
Copying and Cloning Objects	298
Object Hierarchy: “Parents” and “Children”	298
Rendering Object Backfaces	300
Rendering Polyline Objects	300
Casting and Receiving Shadows	300
Smoothing Object Facets	301
Positioning and Rotating an Object	302
Scaling an Object	302
Mapping Textures onto Objects	303
Mapping Types Options	304
Texture Repeat Options	307
Mapping Select Options	307
Positioning and Scaling Texture Maps in Relation to Objects	308
Rendering an Object in the Object Designer Viewport	311
Blurring a Texture Map	311
Setting Bump Map Amplitude	312
Splitting Objects According to Material Definitions	312

The Light Designer **313**

Light Designer Overview	313
The Default Light Source	314
Creating Point Lights	314
Creating Spotlights	314
Creating Area Lights	315
Creating Area Spotlights	316
Creating Projector Lights	316

Casting Shadows	317
Attenuating a Light	318
Displaying all Light Sources in the Viewport	319
Defining a Light's Color and Intensity	319
Positioning a Light	319
Lighting Objects Selectively	320
Lighting and Views	321
The Material Designer	323
The Materials Resource Icon	323
The Viewport	324
Material Illumination Types	325
Assigning Material Colors	327
Assigning Textures to Materials	328
Generating Environmental Reflect Maps	330
Setting Material Opacity	331
Defining a Matte Drop Out (Transparent) Color	332
Viewing and Changing Material-to-Object Assignments	333
Creating New Materials	333
Controlling the Appearance of Materials in a View	333
The Camera Animation Designer	335
The Animation Resource Icon	335
Opening the Camera Animation Designer	336
Defining an Animation: An Overview	336
The Camera Animation Designer Interface	338
Editing an Animation in the Project Designer Viewport	344
Using Reflection Maps in an Animation	346
Lighting and Animation	346
Setting the Resolution of an Animation	347
Selecting the Output File Type for an Animation	347
Playing an Animation	348
Animating Lights, Objects and Materials	349
Before Animating Objects, Lights and Materials	349
Animating Object, Light and Material Attributes	350
Animating Multiple Attributes for a Resource	354
Previewing Animations in the Viewport	356
The Animation Controller Interface	357

Using the Channel Editor	360
Animating Objects	367
Morphing Objects	369
Animating Lights	371
Animating Materials	371
Animating Textures	372
Using Movies in Animations	372
Turning Resources On and Off During an Animation	373
The Visual Font Utility	375
Overview	375
Using Visual Font	376
Visual Model Overview	383
Overview	383
The Visual Model Interface	383
Drawing Objects	386
Setting Points in 3D Space	386
Modifying Objects	387
Munging Objects and Models	388
Controlling the Viewport	388
Selecting Objects	391
Grouping and Ungrouping Objects	392
Organizing Your Work in Layers	392
Moving Objects	395
Rendering Objects	395
Setting Defaults	396
Loading and Saving Models	397
Loading and Using Background Images	398
Using the File Browser	398
Using Visual Model with other Visual Reality Applications	399
Drawing Objects	401
Using the Draw Commands	401
Draw a Line	401
Draw a Polygon	402
Draw a Rectangle	402
Draw a Box	402
Draw an Arc	403

Draw a Curve	404
Draw a Circle by Radius	404
Draw a Circle by Diameter	404
Draw an Ellipse	404
Draw a Cone	405
Draw a Sphere	405
Draw a Hemisphere	405
Draw a Cylinder	406
Paste an Object	406
Undo an Operation	407
Redo an Operation	407
The Pan and Rotate Buttons	407
The Add and Remove Buttons	408
Return to the Modify Toolbar	408
Setting Points	409
Setting a Point in 3D Space	409
Unsetting a Point	409
Moving a Point	410
Using the Point Commands	410
Set an Absolute Point	410
Set a Relative Point	411
Set a Polar Point	411
Snap to the Closest Point	412
Snap to the Closest Line	412
Snap to the Closest Surface	413
Snap to Center of the Closest Surface	413
Snap to Midpoint of the Closest Line	413
The Pan and Rotate Buttons	413
Modifying Objects	415
Deleting an Object	415
Slicing an Object	415
Extrude an Object	416
Sweep an Object	417
Spiral an Object	418
Link Objects with a Polygon Mesh	419
Create a Polygon Mesh Between Lines	421
Copy an Object Along a User-Defined Path	422

Copy an Object Along a Straight Line	424
Copy an Object Around a Circle	424
Assign an Object to a Layer	426
Group and Ungroup Objects	426
Scale an Object	426
Rotate an Object	427
Cut an Object	428
Paste an Object	429
Copy an Object	430
Undo an Operation	430
Redo an Operation	430
The Pan and Rotate Buttons	430
The Add and Remove Buttons	431
The Draw Button	431
Editing Points and Lines	433
Welding Points	433
Joining Points	433
Moving Points	434
Rounding Corners	434
Cutting Corners	435
Breaking Lines	435
Combining Lines	436
Converting Polygons into Lines	436
Converting Lines into Polygons	436
Reversing Lines	437
Changing Lines to Curves	437
Changing Curves to Lines	437
Manipulating Solids	439
Adding Solids	439
Subtracting Solids	439
Intersecting Solids	440
Cookie Cutter	440
Munging Objects	441
Envelope	441
Polish	443
Bend, Stretch and Twist	444

Morph	445
Fatten	445
Convex	446
Triangulate	446
Push/Pull	447
Visual Image Overview	449
The Visual Image Interface	449
The Image Mode vs. the Object Mode	450
Working in the Image Mode	451
Working in the Object Mode	451
Panning and Zooming the Viewport Display	453
Undoing Your Work	454
Loading and Saving Images and Projects	454
Creating Visual Catalog Files with Visual Image	455
Using Visual Image with other Visual Reality Applications	457
The Object Mode Commands	459
Managing Project Backgrounds	459
Creating New Objects	461
Creating and Editing Text Strings	464
Loading Objects and Projects	467
Saving Objects and Projects	467
Managing Objects	468
Editing Objects	470
Recoloring Objects	477
Object Dropout/Transparency	482
Moving Objects in the Viewport	484
The Image Mode Commands	485
Generating a New Image	485
Loading Images	487
Saving Images	487
Managing Images	487
Painting on Images	488
Editing and Processing Images	494
Recoloring Images	499
Printing Images	499
