Time: 5:00 p.m.
Place: McCormick Center Hotel

DataCAD NATIONAL END USER MEETING UPDATE

The theme of the 1988 DataCAD National End User Meeting in Chicago is Office Standards for DataCAD. This year the members of RADIUS have gotten together and written an office standards manual for DataCAD that will be handed out as a part of the registration packet. This manual will give you tips and shortcuts from experienced DataCAD users on topics such as:

Organizing the Office for effective CAD use.
Communicating with Consultants
DataCAD File Organization
Default Drawing & Initial DataCAD settings.
Keyboard Macros
Templates
Plotting your drawings.
Archiving your projects.

This manual will only be available to users attending the meeting in Chicago.

Mr. Oliver Witte, of *Architecture Magazine* will be one of the guest speakers. Mr. Witte has been interested for some time in the strategic management of CAD in the office. He will be sharing with you his findings and comments on the subject. Stuart G. Burgh, AIA, Chairman of the Board of Microstructure will end the meeting with a preview of our latest release of DataCAD and our new AEC products; DataMERGE and DataCAD Velocity. The meeting will be followed by a cocktail reception sponsored by Microstructure.

To register for the meeting, call us at 804/295-2600. The registration fee is \$65.00. You can use your MasterCARD, VISA or send a company check.

I hope to see you in Chicago!

Sincerely,

Lou Bodnar
